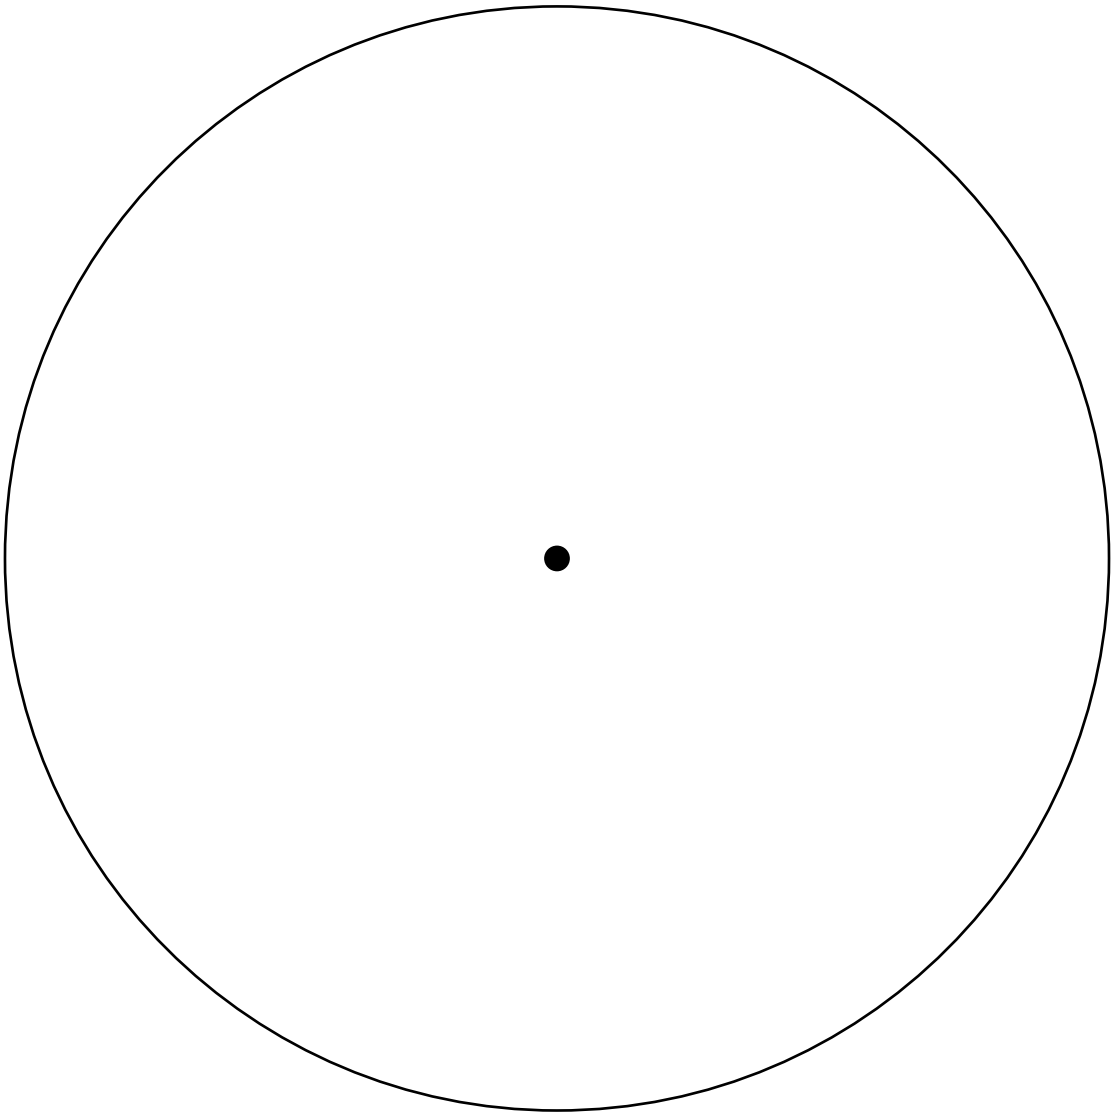
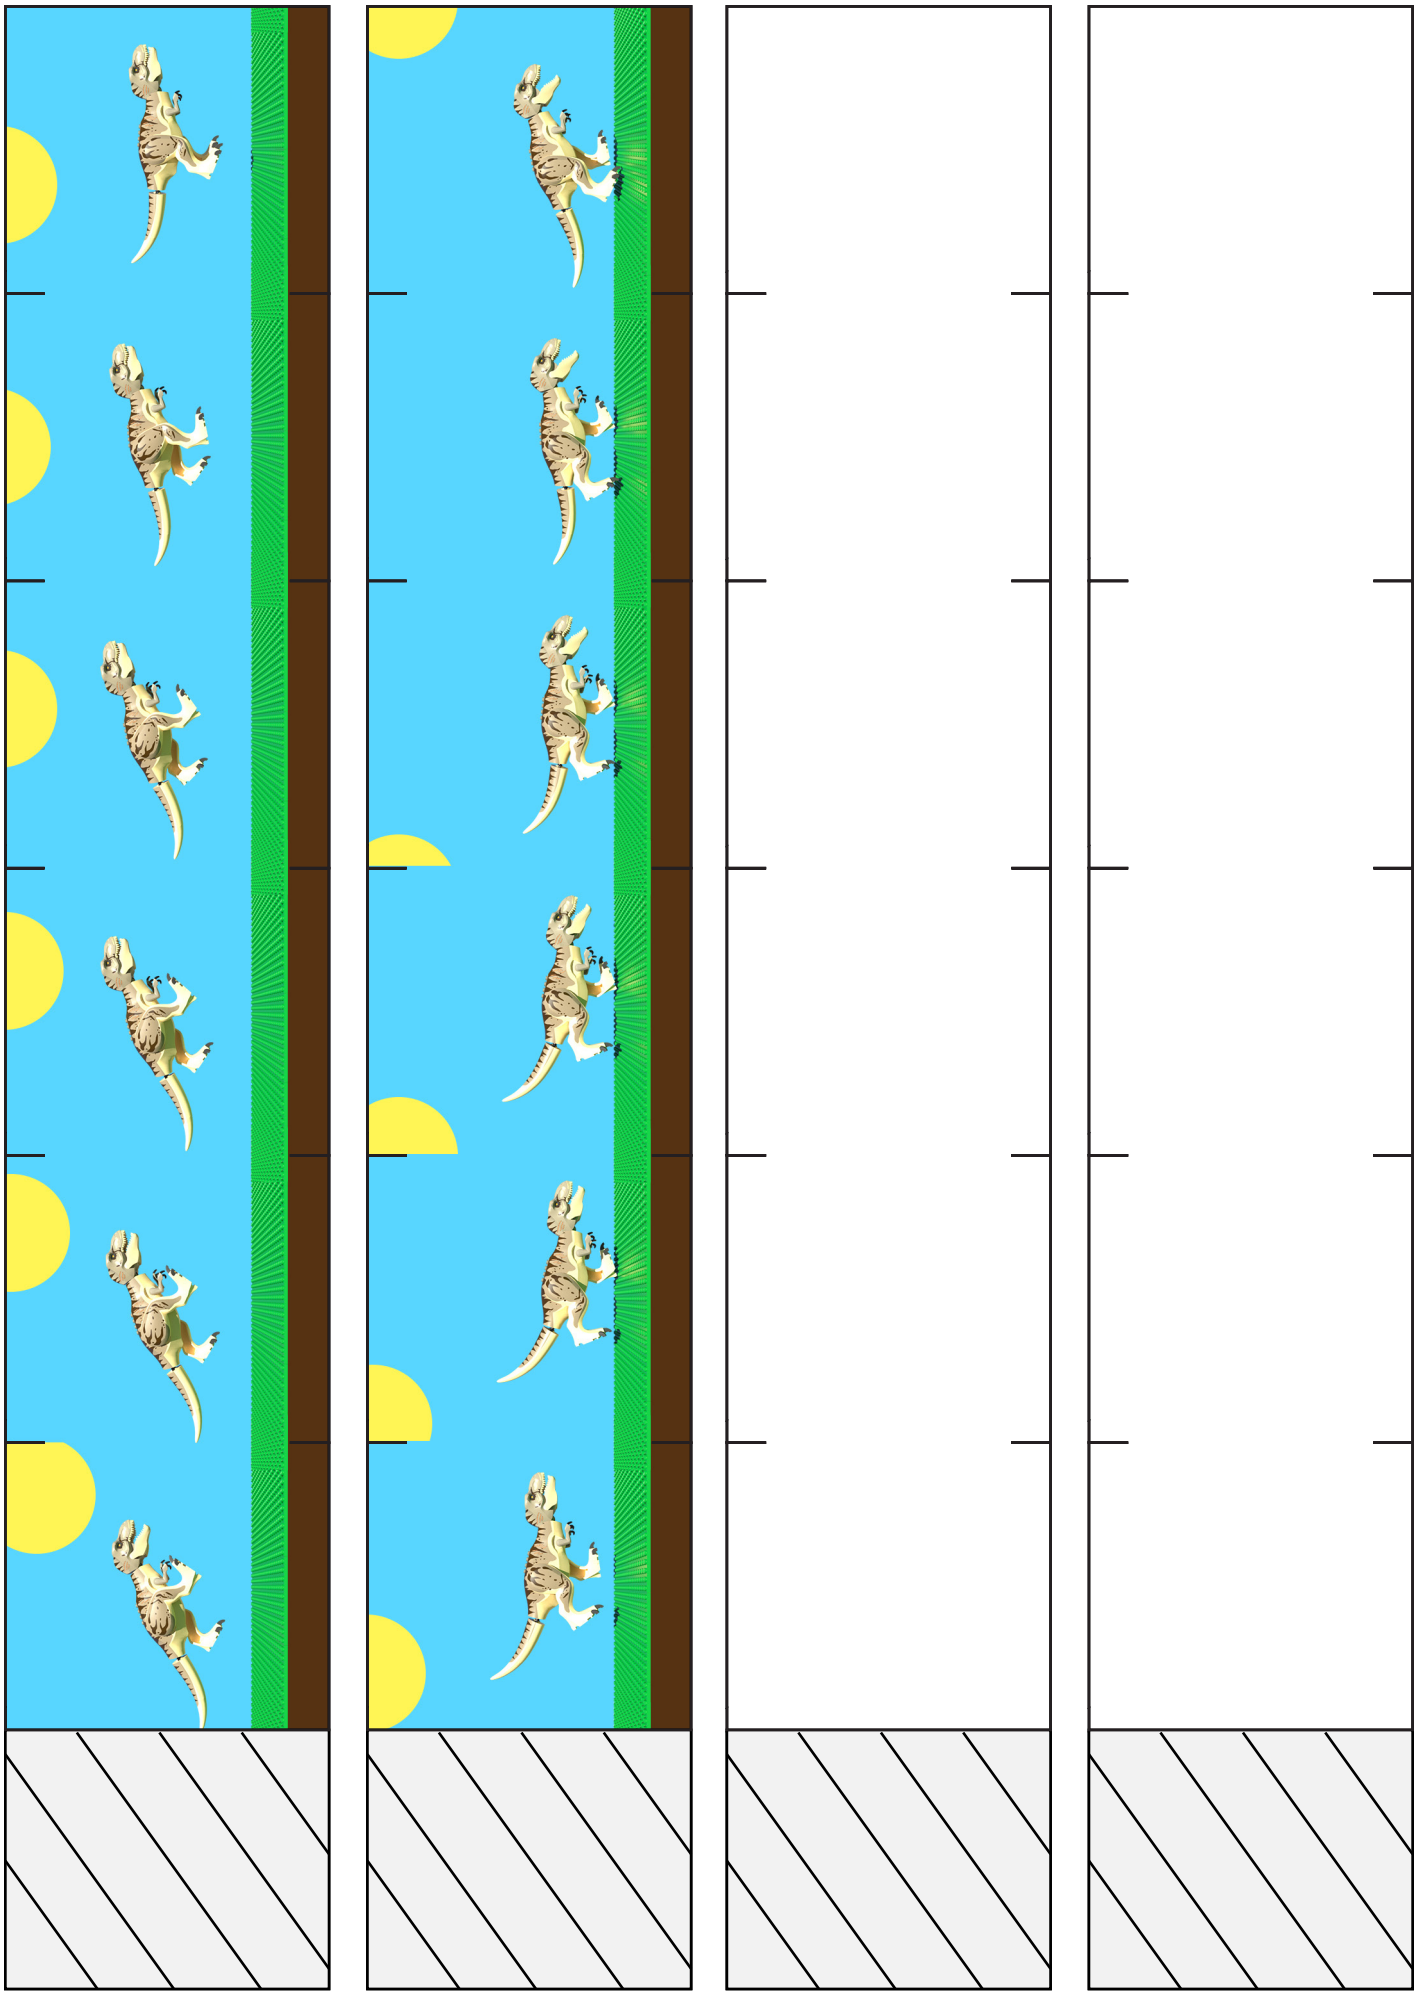
*Print on paper or, for better overall experience, **print on card.**



Did you know?

The zoetrope is one of the earliest animation devices. When you look at the images spinning in the zoetrope, they appear to be moving! This is because the images are spinning so fast that your brain merges them together to see one moving image.

Draw **your own** 12 frame animations!



Panel A
(connects with panel D)

Fold

Cut

Apply glue or use tape

Black panels in front

Panel B
(connects with panel C)

Panel C
(connects with panel B)
